• Fully hydraulic controls from the basket and at ground level. Control panel in the basket is covered by an

aluminum plate. Below portion of basket is covered by aluminum chequered plate for safety.

Safety features:

- Engine on/off control from the basket and ground
- Manual emergency descent controls
- Emergency stop buttons: single press button in case of dangerous situation to stop the platform
- Emergency hand pump
- Outreach controlled by automatic limiting device
- Flanged lock valves on all cylinders to prevent accident in case of hydraulic failure / hose failure
- Planarity check device
- Outrigger/boom interlock: prevents the platform being operated unless stabilizers are firmly on the ground
- Outrigger resting plates with housing on platform floor
- o Electric hour meter
- Fittings for safety belts on basket
- Test button for signal lights on panels
- 4 hydraulic outriggers; vertical down; all with check valves
- 12 V socket on the basket allows to connect extra tools in the basket (like wind speed monitoring; phone charger, etc.)

- 230 V or 110 V / 16 A socket on the basket allows to connect and work with power tools (drills; etc.)in the basket
- Max. pressure valves on hydraulic system.
- Special Toolbox mounted on the deck behind the cabin

 Installation on the ISUZU Double Cabin Truck including fixed sides (0.25m high); floor chequered plate; PTO and as per high quality PALFINGER standards with accessories. Painting: grit blasting SA 2.5 (40microns), primer epoxy-basedcoat, primer filler coat and 2 top coats of WHITE color.

SCOPE OF INSTALLATION:

- P240A will be installed on the Isuzu Double Cabin truck chassis.
- Production of adequate subframe and chequered plate for floor and cargo box with fixed sides of 250mm height; so that you can keep cones and other material inside.

- All hydraulic fittings and PTO to run the platform.
- 2 Nos. Revolving Beacon light at the rear.
